

Report on Freelancing Activities by College Students

1. Introduction

Freelancing has emerged as a significant platform for students to gain practical experience, financial independence, and entrepreneurial skills while pursuing their studies. At our college, many students are actively engaged in different freelancing opportunities that not only support their academic growth but also enhance their career prospects.

2. Freelancing Activities Identified

M.Com Students – Teaching Home Tutions

A large number of M.Com students are involved in providing home tuition services. Through this activity, they are not only earning income but also improving their teaching, communication, and subject handling skills. This contributes to their confidence and prepares them for potential careers in teaching, coaching, and academics.

BCA Students – Website Designing Projects

Four students from the Bachelor of Computer Applications (BCA) program are working collaboratively on designing a website. This real-time project allows them to apply their technical knowledge of programming, design tools, and user interface development. Such freelancing work gives them exposure to client interaction, deadlines, and teamwork important elements of the IT industry.

PGDCA Student – Business in Organic Beauty Products

A student pursuing the Post Graduate Diploma in Computer Applications (PGDCA) has successfully initiated a business dealing with organic beauty products. This entrepreneurial effort highlights the spirit of innovation and self-reliance. The student is managing product development, marketing, and sales, which reflects commendable business acumen alongside academic pursuits.

3. Conclusion

The freelancing activities undertaken by students across different courses reflect the proactive approach of our college community in integrating education with practical work exposure. These endeavours not only provide financial support but also prepare students for future professional challenges by equipping them with valuable skills such as communication, technical expertise, business management, and innovation.
